

Freight Forwarding Management for SEA

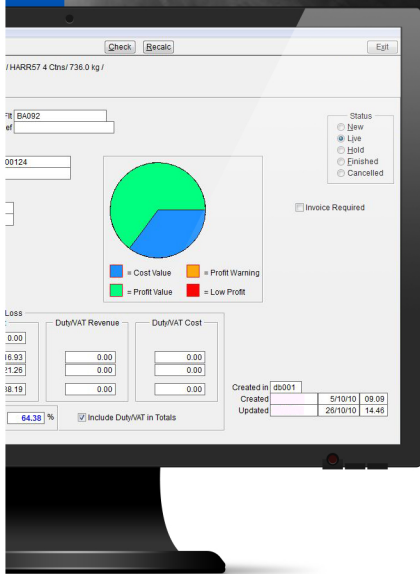

All your documents in one place...

Our Freight Forwarding Management System incorporates unique features not found elsewhere, including a document storage facility allowing paperwork relating to specific jobs to be electronically filed and recovered easily with minimum time and effort.

Vixsoft's optional plugins offer additional functionality enabling documents to be attached to projects from within Microsoft Outlook 2007+. Scanned documents can also be attached, eg signed PODs, even when received in bulk.

Company wide visibility...

Corporate data for freight groups is held within the central Vixsoft databank. Updates are synchronised instantaneously and system-wide, facilitating immediate visibility to users throughout the group regardless of their location. Data need only be entered once, increasing efficiency and accuracy of projects through dramatic reduction of labour and risk.

Manage your SEA Freight with ease...

Vixsoft's software offers a fully-integrated environment capable of satisfying the complex needs of sea freight operators who are required to deliver a fast and reliable service in today's tough global economy.

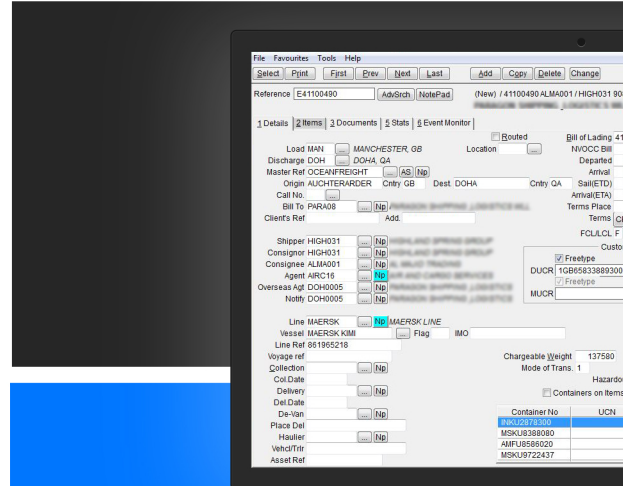

From point of quotation through to delivery, Vixsoft provides the most comprehensive financial and management information, equipping the operator with real-time intelligence and competitive advantage. Vixsoft's system offers complete management of emails and documents to dramatically improve productivity. Its ability to automate many routine tasks combined with a wide range of functions increase accuracy, efficiency and ultimately **PROFIT!**

Freight Forwarding Management for SEA

- + **Quick and easy-to-use** - Incorporates a simple user interface with logical navigation and flow of processes.
- + **Variety of printed documents** - includes FIATA, house or ocean bills, collection/delivery notes, in-house and user-defined documents, invoices, manifests and many more.
- + **Fast-build facilities** - allow for effective management of LCL consolidations including builtin calculating of cubic weight from dimensions.
- + **Optional track and trace including vessel location** - Online portal that you and your clients can view with live updates.
- + **Job Costing** - Monitor quoted and actual job costing to improve cash flow.
- + **Reporting** - A range of operational management reports.
- + **Convert quotations to consignments**
- + **Customs clearance** - Clear goods directly from the job via all popular communities including Destin8, CNS and Dover, etc.
- + **Powerful integrated functionality** - Single data entries populate multiple forms. Create templates for fast and efficient entry of replicated jobs.

Smarter not harder...

Our software enables sea freight operators to win and maintain business in today's increasingly competitive global market. It provides all the tools needed to effectively process sea freight shipments, enabling smarter not harder working no matter what business the operator or NVOCC agent is engaged in; imports or exports, single or multi-container FCL's or LCL consolidations. Those involved in export benefit from the system's specialist document generation tools for FIATA as well as House or Ocean Bills of Lading.
